

$$25 + 32 = 57 \text{ neg}$$

June 29, 2005  
one true PR

$$\begin{array}{r} 25 \text{ cases} \\ - 1 \\ \hline 24 \end{array} = \frac{15}{24} \text{ converted}$$

Let's July 18, 2005

$$\begin{array}{r} 32 \text{ cases} \\ - 12 \text{ ? positive ER \& PR} \\ \hline 20 \end{array}$$

remaining 9 of the  
twenty converted

$$= 9 + 15 = 24$$

$$\frac{24}{44} = \underline{\underline{55\% \text{ conversion}}}$$

Issue of conversion up in air due to  
increased sensitivity of Venona  
Must compare conversion rate to Mount Sinai  
Problem of comparing, different platforms
