Hi,

I met with Bev Carter, Ford Elms, Don Cook, Nash Denic and Susan Bonnell on Friday afternoon. We reviewed the presentation for Monday and it's very good and comprehensive. As always, Bev's comments in the meeting were a little bit alarmist in nature but she is only speaking about ER/PR testing at the presentation.

Dr. Howell called me on Friday afternoon and told me that he would anticipate that I would be asked at the executive meeting on Tuesday am if I felt that everything was done that could be done in the Lab as per the external reviews. He arranged for Nash to give me the summary document of the reviewers recommendations and the labs actions. It has not been updated since June and alot of the recommendations have "ongoing" next to it.

At Friday's meeting we decided that Monday am we will meet and do a CAP audit of the lab and see how we do. This will be an audit of documentation mostly.....I'll update you on how it goes

Heather
