- Past Member

GOALS

- Coordinate existing regional surgical pathology , cytology, and autopsy services, providing timely and concise reports to all medical staff.
- Utilize communication and interpersonal skills, along with knowledge of disease processes, in conducting a full utilization review of services, to provide the most appropriate timely and cost effective regional testing service. This would be done in consultation not only with medical staff and administration, but also with provincial and national referral centres.
- Liaise with all medical staff in the region to provide ongoing test interpretation and clinical consultation in relation to specific disease processes.
- Offer proficiency and knowledge in the area of management services and information technology, realizing the current status of health care economics.
- Become more fully involved in local, regional, and provincial decision making with appropriate medical committees, providing full range of laboratory and consultation services for the people of Western Newfoundland.
