Subject: ER/PR

Hi Heather

Received a call from Dr. Joy McCarthy this morning advising that she did not get the original letter on [REDACTED]. On the patient's chart was only the copy that was sent to Dr. Tompkins. My records show that the letter was mailed to Dr. McCarthy. Dr. McCarthy called back to say that she called this lady this morning and apparently she was notified by Dr. Tompkins (who was copied letter) that the panel recommended treatment with tamoxifen. The lady refused tamoxifen at that time according to Joy. Joy advised also that her ER/PR results were not on the patient's chart and no notes at all about her being notified of the panel's recommendation. She still insists that she did not get the original letter and it must have been lost from my office to hers.
