Subject: Open Line - Breast cancer screening

Mercedes, breast cancer screening

- don't know at this point if it was human error or a machine. mentioned Dr. Williams appearance on Out of the Fog
- is one of the people who tested negative (back in February) and is still waiting to hear about the retesting
- has an aggressive cancer and needs those results
- who audited the labs to check on the standards
- worried that she did not get the proper treatment, should probably be on tamoxifen
- surprised that more women are not calling in

HOST asks other women to call in
