Hi Dr. Mullen,

Ruoyu re-ran the negatives you and I had picked and it is ready for you to look at I have asked Muntajib to put the first and second slide together so that you can compare the two slides. From what Ruoyu can see one case is now positive where it was previously negative. Also at the moment we have not stained any further cases since we are now down to one staining machine because the other instrument is non operational.

Maria

Hi Dr.Mullen

I wonder if you could advise me of the status of our repeat ER's and PR's and when we can expect additional reports.We certainly appreciate all your efforts in this situation.Many Thanks.

Regards  
Dr.Cook
