 Subject: Estrogen Receptors/Progesterone Receptors

Many of you may have heard in the media about the issue with breast cancer patients and the testing for Estrogen Receptors/Progesterone Receptors at Eastern Health.

>
 > We are currently working with Eastern Health to re-submit previously collected tissues samples from breast cancer patients for re-testing from the period of 1997 to 2004. The re-testing will not change an individual's diagnosis but may be one of the factors considered in determining the type of treatment a patient will receive.

>
 > We have prepared a handout for physicians, public health nurses, the Provincial Breast Screening program, nursing administrators, and other groups to provide to their clients who may have concerns about this issue.

>
 > For your information, I have attached the link to this information which has been posted on our organization's website.

>
 > <http://www.healthwest.nf.ca/ERPR%20Client%20Handout.htm>

>
 > Thanks,
 > Heidi
