Ken,

I have no problem with Eastern doing this, however I would like Western to have the opportunity to review as well. I am unclear as to what the problem really entails. If Mount Sinai says DCIS, they may only have reviewed the slide and block we sent them. There may indeed be only DCIS left on the slide, but other blocks they did not review may show invasive. Only review of the entire case would show this, therefore I would like to have the original pathology reviewed here as well.

Thanks,

Paul

Hi Paul

Could you please provide your recommendation. Tnx.

Ken
