Stephanie,

The process is as follows, from what I can understand, reports are coming to St. John's for review in the retesting of the ER /PR Clients.

I have not copied any reports to files as I haven't received any Pathology reports. I will check to see if this is happening at the West side and I have forward this to Sherry who will be doing all of the follow up with this issue. All patients / families will be contacted but the deceased are at the bottom of the pile and I am unsure how this is going to be approached.

I have taken the liberty of c.c. this email to Heather Predham for a response.

Judy

Subject: Reports on deceased patients

Hi Judy,

Larry raised a concern with me regarding reports that are coming back from Mt. Sinai. He wanted to make sure that we aren't copying these reports to the files of deceased patients as we have not talked to their families.

I know this is not something that you would do, but I was wondering who you think I should follow up with to ensure that this isn't happening. Are reports from Mt. Sinai arriving at our labs?

Thank you.
