Hi Moira

Just an update on this file, related to an e-mail received in the Minister's office in early June. This lady had breast cancer and was wondering why she hadn't been contacted in the ER/PR review process, as she understood her results were negative. On review of her file, we determined that she was in fact ER/PR positive and had been started on Tamoxifen. I explained this all to her personally, and reassured her that she is on the proper treatment. She has been seen by her oncologist on routine follow up recently, and is doing well. She was satisfied with the explanation provided.

Ken
