I spoke to Debra Wurtzfeld today. She called to inquire about the pathology results that she has been getting on her breast ca. patients who were re-tested. Dr W. wanted to know who would be giving these pts their results & asked if the ca. clinic is getting in touch with them.

I told her the ca. cl. will contact the patients who are currently being actively followed. Dr W. said it would be a lot of work to find out which of her patients are and who isn't being followed. So, she wants us to know she won't be doing that.
