Hi Heather,

A patient named [REDACTED] mcp [REDACTED] called me on Nov 17, said she had lobular CIS in 1997 & inquired whether she had ever had er-pr testing done, and if not, could she please be tested now. Dr Cook agreed to send her specimen & her results are now back, positive. I guess she will need to be "panelled". I do not know if a doctor has been in touch with her, the original

surgery was done by Dr Gardiner, but Dr Kwan saw her in July of this year.
