It seems to me, although I wasn't aware of this lady's particular case, that this is an unfortunate event totally unrelated to ER/PR that would never have surfaced if we didn't do the retesting. True?

Hi Susan,

We did see the article on the weekend. Nancy is reviewing the notes on [REDACTED] situation – Nancy has had significant contact with this lady—at least 3 times in the past 2 weeks and is familiar with the specifics.
