Ms. Heather Predham
Risk Management Consultant/Assistant Director
Quality and Risk Management Department
12th Floor, Southcott Hall, L.A. Miller Centre Site
100 Forest Road
St. John's, NL A1A 1E5

Heather
Dear Ms. Predham:

As per your letter dated May 23, 2008, the Centre for Health Information would like further clarification on the list of self-identified patients.

For the 8 patients on that list, please provide the following information:

Region and site (applicable to St. John's region only)

Pathologist name who reported original

Whether original was performed on Dako or Ventana system

Date sample sent to MS for retesting (or date retested on Ventana)

Block Number

Date patients self-identified

How patients were communicated with results (panel, phone call, etc.?)

Specific questions for the following patients have also been identified:

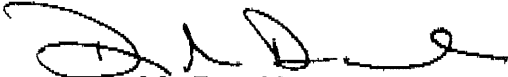

Name	MCP#	Spec#	Original Results		MS Results		NLCHI Question
			ER	PR	ER	PR	
			Negative (<25)		Retested through Grand Falls		Will Grand Falls provide the Centre with further information?
		00:SU7011	pos 10-20; weakly pos 30-40		Follow-up to see if patient requires retesting		Has this patient been retested?

CIHRT Exhibit P-3312 Page 2

		S-4631-97	Faint pos 10-15	80-90	Dr. Neil states Spec done in Apr 97, outside testing period and will not be retested	An email was sent by Robert Thompson on Nov 26, 2007 to Susan Gillam and Dr. Jenkins stating that all cases from Jan-May 1997 should be retested. Therefore this patient should be sent for retesting.
--	--	-----------	--------------------	-------	--	--

If you have any questions regarding this feel free to contact me at 752-6008.

Sincerely,

Don MacDonald

Director, Research and Evaluation
