Subject: ER/PR data

Attached please find the ER/PR results for the NL retrospective review. The initial report of the ER/PR results has been revised for 7 cases due to restraining of the material when the initial specimen was negative and the internal controls were either negative or absent. The cases are [REDACTED]
[REDACTED]

When you have had an opportunity to review the results, I would like to discuss some of the technical difficulties we encountered with processing and staining the specimens. Some of the same issues are present in the current NL material.
