April 10/06  
Dr. [REDACTED] called  
pt. in office  
I faxed over  
Ledger  
& told him  
recom. verbally  
[Signature]

Dear Dr. [REDACTED]

RE: [REDACTED]

MCP #: [REDACTED]

Ms. [REDACTED] was diagnosed with breast cancer in 2002. The original report of the estrogen and progesterone receptors showed negative staining for estrogen and <5% staining for progesterone. A repeat report from Mount Sinai Hospital has shown the levels of estrogen and progesterone to be 60% and 50% respectively.

This patient was discussed at the Physician Review Panel on March 4, 2006. The recommendation of the Panel is that this lady should be offered treatment with Tamoxifen.

If Tamoxifen is contraindicated or not tolerated, an Aromatase inhibitor may be used in post menopausal patients.

If you wish, this patient may be referred to one of the Medical Oncologists at The Dr. H. Bliss Murphy Cancer Center for further evaluation.

We would ask that you communicate this information to your patient as soon as possible.

Yours sincerely,

Kara Laing, M.D., F.R.C.P. (C)  
Clinical Chief, Cancer Care Program  
The Dr. H. Bliss Murphy Cancer Center

**To:** Dr. Robert Williams; Patricia Pilgrim; Dr. Donald Cook; Pam Elliott  
**Cc:** Debbie Parsons; Denise Dunn; Dianne Smith  
**Subject:** Panel update

Hi,

I just wanted to give you an update on the panel yesterday evening.

We had a total of 21 charts to review. 4 had already been seen, informed and dealt with by Dr. [REDACTED] so they were not officially panelled.

Of the 17 we reviewed:

- **Converted with no recommendations: 13**

[REDACTED]

2 of this group were considered positive at the time and recieved treatment as such

- **Converted with recommendations: 3**
- **Requires further testing: 1**

This patient was retested on the sample from one breast, but not the other and before recommendations can be made this infomration is needed.

So, all the patients with results have now been contacted and/or reviewed.

In total the panel has reviewed 60 patients. We have discovered since that one person had died and we will defer that letter until later:

- **Converted with no recommendations: 35**
- **Converted with recommendations: 21**
- **Requires further testing: 2**
- **Had multiple results and requires follow-up: 1**

I'll give you an overall summary to date later today

Heather

February 7, 2006

Dear Dr. Laing:

Enclosed Letters for your signature and review. I have enclosed some blank signature sheets in case there are changes to be made.

Update of those patients with no letters from February 2<sup>nd</sup>

██████████	Deceased
██████████	Deferred until Feb. 9 <sup>th</sup> – No Cancer Centre Chart Heather to check on
██████████	Chart in ██████████ Deferred until Feb. 9 <sup>th</sup>
██████████	Heather to write Dr. ██████████ regarding her frail medical condition and recommendation of panel for no further treatment.
██████████	Patient previously paneled and letter gone out. Same recommendation.
██████████	No letter – confirmed negative
██████████	Chart in ██████████ Deferred until Feb. 9 <sup>th</sup>

I am hoping to get 2 sets of minutes to you before you leave but may not.

Hi,

Here's the summary of activity to date. We did 26 last evening. We also had a discussion and made some decisions re: two groups

**1) DCIS/NT:** we have been reviewing the pathology reports as we go along re: these results. If they were previously diagnosed as DCIS we have been notifying the region, but not paneling the person, as the ER PR result does not impact treatment of people with this type of cancer.

The others will require the slides, interpretations and clinical history to be paneled with a group of pathologists and oncologists to see where the discrepancy lies. When the regular panel has completed the entire list, this will be done

**2) "Retro" converters:** this group are ones that were actually ER/PR positive but have come back from Mount Sinai as ER/PR negative. These will require review of both our slides and Mount Sinai slides as well as the clinical history of the patient. We have 5 in this group right now that will be deferred to the end of the paneling so they can be done as a group. Along with this five are four others that, although had a degree of positivity when originally stained were considered clinically as negative, so they were not treated. All four have been considered as confirmed negative and contacted.

They are calling for a blizzard in the am...the panel will be contacting each other in the morning to decide the impact of the weather on our start time in the morning

Re: Review of Patients from [REDACTED]  
ER/PR Status

*Faxed  
March 8/06  
2:50 PM*

Hi There

During the review of patients from [REDACTED] a lot of the time we did not have the patient's chart. Can you assist me in trying to find the Family Doctors on the following patients from your area? Also if you find out that the patient is deceased, please indicate this.

Name	MCP Number	Family Doctor / Status
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED] -no fixed address for this doctor
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	?deceased
[REDACTED]	[REDACTED]	?deceased

The following patient's chart revealed that she has moved to [REDACTED], would you have a forwarding address and treating physician's name – it was also questioned whether she was still alive

[REDACTED] MCP [REDACTED]

As we are meeting again tomorrow I would like to have this info as soon as possible.

You can either call me at 777-6777 or fax info back to 777-8033

Thanks in advance

Debbie Parsons  
Secretary – ER/PR Review Panel
