Hi Heather:

Bev is going to be speaking to Robert as to how we will proceed (re my earlier e-mail). Have not heard back yet and I am in Montreal until Thursday - talk to you soon

Hi,

It's pretty much accurate. I do have some changes as outlined below, I don't know how important they are to you:

First bullet: I would just clarify this to say 1997 to April 2004

Fifth bullet: In the last interrogatories I had to sign for court, the lab told me that there were 2214 ER/PR tests done for the time period, not 2760. And of course by negative in this paragraph we are talking clinically negative not necessarily 0%. (30% prior to 2001; 10% 2001 after). We also only identified patients for retesting based on the ER value, not the PR value

There are a few more changes that I have to follow-up with Bev, but it's only clarification of wording....if you want to know, I can tell you, but it's not really factual information

If there's anything else you need, let me know

I'm off to Pathfinder camp on Friday.....I'll be gone on Monday and Tuesday, but I'll have the cell phone and you can leave a message.....if you really need me I can come back to town.....

Heather
