HI all,

I've had a quick look through the lists and there are questions that I can't contribute to..... however, in List #3 there are 2 patients who were originally tested in 2005. With one having an ER of 10-20 and the other having an ER of 20, they didn't meet the criteria for retesting.

In scanning through list #2, a lot of the patients fall into that as well.....if the years are right in the specimen number column, then at least 20 fall into that category.....

I note that there is no option addressing that at the beginning of the letter.....from the narrative before each table, they seem to be defining the retesting as "less than or equal to 30) without any reference to years.....I think that should be clarified.....

Terry, if you need me for anything page me at 570-9703

Heather

Forwarding on behalf of Patricia Pilgrim,

9/24/2007

Terry,

Please review the attached letter from the NLCHI a.s.a.p. and call me tomorrow on my blackberry at 687-9915.

By copy of this E-mail I am also forwarding a copy along to Heather Predham for information and any help she can provide to you.

Pat
