Subject: reconciling spreadsheets

Hi everyone,

I thought if there were two issues, there could be more so I went through the January 2006 spreadsheet sent from Mount Sinai. I looked for results identified by ditto marks but having an RS# the same as the results below it. As you can see there are 4 more in total (one of them, situation #3 below was identified and addressed this past summer)

Nash, can you follow up on these? As well, someone else should probably have a look through them to see if I missed any.....

Heather

Situation #1**January 2006 Spreadsheet**

RS#	Specimen #	Name	Block	Region	Tumor	ER	PR
RS- [REDACTED]	01:SS4979	[REDACTED]	C	St. John's	D	30	60
RS- [REDACTED]	"	"	2G	"	D	0	0
RS- [REDACTED]	02:SU10391	[REDACTED]	2F	St. John's	DCIS

RS [REDACTED]	02:SU10391	[REDACTED]	2F	St. John's	DCIS		

Meditech: Assuming that the second sheet is correct, Meditech Results for [REDACTED] agree, but the results for [REDACTED] are not in Meditech (only the Ventana retesting results are there).

Outcome from retesting

[REDACTED]: she was paneled and there was no recommendation as she was already on Tamoxifen
 [REDACTED] was contacted directly by her oncologist with her results

Assuming that the second sheet is correct, Meditech indicates that [REDACTED] is ER 0/PR 0 on RS# [REDACTED]

Outcome from retesting

Both were identified as confirmed negative and would have been contacted by the Region
