Hi all,  
I did inform her that we tried to contact her as indicated in ER/PR data base. So she is aware but she posed the question of how we got her address but not contact her before this, I explained that we had not sent out a letter to her previous to this so would not have had her current address. Now comes to my mind is did we try to sent a letter when the courts told us?  
But now comes the question: Where did we get the address???? I did inform her that someone would be calling her this week.

So, I have tried her doctor again, and finally called the Chemo unit at [REDACTED] Her doctor is away until Wednesday. Janet was off this am, and I don't know if she is coming in this pm, as she was not feeling well. I did talk to Dr. Siddiqui about this on Friday. I think someone needs to let her know what happened in terms of attempts to notify her, and then we can get a physician to talk to her. I was hoping to be able to ling the oncologist there up with us. I don't know if Janet has told her what has transpired??

Hello, Just a couple of things. I am tied up at the ARNNL for the next two days. Just need to see where we are with a few things?

- Sharon/Janet.....How did you make out with that lady's doctor in [REDACTED]? Hopefully, someone has been able to speak to her. If not, we need to get some doctor from here to make contact? Another question, had we tried contacting [REDACTED] about her before? I am assuming we did as this information was in OPIS, I believe?
- Heather/Janet.....Can one of you get a list of all patients who we were unable to contact and see if we now have any new addresses on them? I was thinking that perhaps Janet could do this? I understand that they were given to NLCHI to run through the MCP system to see if we could get some more up to date information on them. Can you do a table on them to indicate the status of them..if there is any further information. and include the status of their results?
- Heather..... Can you try and get the table completed for the NT patients

Can you get in touch with Sherry Freake and see what her situation is with the review of "contacted by physician?"

Can you do a table of the "DCIS results from Mount Sinai" so we can get Nash to review with us when we have the Panel Meeting. I know I am repeating myself on this one...sorry!

- Dianne/Nancy..... We still do not have the right information from Northern re the about 18 patients. The

whole intent of

this exercise was that these  
were next of kin of deceased patients who called looking for  
results and we

had to verify that they had  
received the results. The response dates that we got from  
Labrador/Grenfell

are all for November, 2007  
which is before we had results back for the deceased.  
Therefore, this

piece of the report is not  
complete. I need someone to talk to Dr. Dankwa's  
secretary.....Dianne can

do this, but she may need  
Nancy's help as this secretary is not all that receptive to our  
calls.

- Heather.....Can you follow up with NLCHI and  
ask the question....."why would the people we could not  
contact be

In the database as living.....  
why are they not in there as some Unknown category such  
that when you

ask for a search of "all living  
patients"...they would not show up on the list as happened  
this time." If we

could not contact them we do  
not know they are living or deceased...so there appears to  
be a major

problem here, does there not?  
If we get this done, we will be well on our way to have the  
database review and updating done. I am not saying the  
database is complete...would never say that? Pat
