**[Dr. Nebojsa Denic]**

*I think that the we should sent them for re-testing, since we already have a channel with Mt. Sinai open. Tell them to send us the blocks. When we resume the testing in our lab , then we should re-test them here..*

Hi,

I guess we need a plan to address the retesting of patients whose samples are not in our control. Should we get the regions to send them out or we will get them sent in and do the retesting.....I would prefer the second option because we will be able to keep track of the results.

With [REDACTED] now that her husband has requested the results, can we arrande for her to be retested?

let me know

Heather

Hi Heather,

Dr Paul neil called back. He said [REDACTED] was not re-tested because she is deceased, & they have not been given any instructions to re-test any deceased patients. He is willing to send this lady's sample for re-testing if we wish. But someone has to let him know. I will call [REDACTED] back & tell him we did not yet re-test her sample.
