Subject: Summary of results
Importance: High
Attachments: internal summary of results.xls

Hi,

I was feeling a wee bit confused, so I did up this summary of the recent results received.

Please note that of the summary I did for the Department of Health last week (of the 17 patients who were the subject of the news conference) all the patients who had changed results had been on tamoxifen.

HOWEVER, there are two patients who called in during the summer, whose results changed and have never been on Tamoxifen:

- [REDACTED] was not on Tamoxifen as she had been interpreted as negative. I have called Dr. Laing's secretary to make Dr. Laing aware of the change in her results
- It doesn't appear that [REDACTED] was on tamoxifen. She was a patient of Dr. Siddiqui in 2001. She called in this summer as she was negative and did not get a call from us. Do you want me to call his secretary as well?

Let me know

Heather
