**Subject:** calls today

Hi,

So far today, Nancy has received calls that may indicate two more ladies who should have been retested but weren't.

Barry and/or Nash can you confirm that these two should be retested?

#1 [REDACTED]  
MCP# [REDACTED]

She was originally tested in 1997 (97: SU000449) and was "weakly positive (more than 5% and less than 50%)"

#2 [REDACTED]  
MCP# [REDACTED]

She has had two cancers

2003: right breast 03: SU3179 indicates that ER PR is completely negative. This was not retested.

She subsequently developed cancer in 2006 in the left breast (done at Mount Sinai)  
06:SU2395 ER 95% and PR 60%

She is currently taking Tamoxifen

Thanks

Heather
