Subject: Recent results

Hi,

Nash sent out a spreadsheet form Mount Sinai this am:

██████████
This lady is deceased and had been retested and converted. Her husband had called and received the pathology results and a copy of the reports.

Originally her 1997 specimen was done via biochemical assay and Mr. ██████████ requested that that be retested at Mount Sinai.

She was ER 18 (equivocal) PR 258 (positive) originally by biochemical assay

Her MS results are ER 95 PR 95

Nancy already mailed him a copy of these results

- ██████████
- Was originally ER negative PR 40-50 in 2000. Her daughter had called asking whether or not her mother was affected. The patient is still alive but very sick as she has lung metastases diagnosed in 2006. She was not identified for retesting originally
 - Dr Zulifqar saw her in 2006 and based on her 2000 ER/PR started her on Femara.
 - She was just retested at Mount Sinai and came back as ER 30 and PR 60.
 - **She will have to be paneled**

██████████
This lady was originally positive and requested to be retested

Her results have returned and she is ER 95 PR 80

Sharon, I believe she called you originally, would you want to call her back?

██████████
This lady was originally ER 80 and PR 80 and requested to be retested

Her results have returned and she is ER 80 PR 60

Nancy will call her and tell her the results

██████████
This lady was originally ER 0 PR 30 in 1998

Dr. Felix's office called the lab to inquire about her retesting results but patient had not been identified

Her retesting results are now ER 30 and PR 25

She will have to be paneled and dr. Felix notified

Thanks

Heather
