

Debbie.....these are the files...

	MCP#:	
Original HCCSJ results:	Specimen #	98: SU9388
	ER/PR	N/N
	Diagnosis	High grade DCIS
Mount Sinai results	Diagnosis	DCIS
Current Status	Specimen #	98: SU9388 notes 8mm invasive with background of DCIS
	MCP#:	
Original HCCSJ results	Specimen #	97: SU007090
	ER/PR	N/N
	Diagnosis	1.5 mm invasive
Mount Sinai results:	Diagnosis	DCIS
Current Status		97: SU007090 1.2 mm invasive

Region	Patient Name	Category
Eastern		Invasive Cancer (Heather to check on ER/PR Awaiting review
Central		Bev carter asking for opinion to o'Malley in Mt Sinai on this case.....appears benign Get the chart: How was this dealt with after the diagnosis was made
		Was invasive 1.5 mm At least DCIS at this moment but in 2000.....going to rule out microinvasion on block
Western		Paneled: confirmed infiltrating ductal carcinoma
		2 reports; invasive diagnosis with positive ER/PR Confirmed infiltrating
