Re: ERPR Reporting

For ER/PR retested cases, use the following canned text:

This case was referred to Mount Sinai for retesting of ER/PR status as part of Eastern Health's Quality Review process. The results from Mount Sinai are as follows. Please correlate with the previous result.

Note: Please make sure this is used only for retest cases. i.e. there should be a previous addendum report with ER/PR result already done.

Also record that we have this report returned from Mount Sinai in our ER/PR file.
