Great as long as we get rid of them by the first week of June.

Dr. Mullen, I'm away on Tuesday and Wednesday so I will recut the blocks on Thursday (is that OK with you?) and give them to the immuno gang. Gordana knows there will be slides coming.

Thanks,
Nancy

Subject: Re-testing ER/PR

Hi Dr. Mullen,
I am a new Clinical Chief of the Laboratory Medicine Program, Eastern Health. Recently Dr. Cook stepped down from this position. I will be taking over some of the issues related to ER and PR. I would like to thank you for your efforts and all of the work that you have put in regards to ER/PR. We are expecting to resolve all of the issues very soon. However, I still have to ask you for another favour (probably the last one) that if you can re-test the group of 7 patients who turned to be retroconverters. We would like first to deal with this group of patients since the therapy might not be appropriate. The list of the patients is enclosed.

<<Retro list.xls>> I would appreciate if you can provide us with the requested tests as soon as possible.
