Hi Ken

Yes, Ken I visited Dennis Boone in the lab. He was very helpful. The MCP numbers were provided approx 2 weeks ago.

At this time I am awaiting Heather's feedback regarding the remaining clients/patients. Awaiting the decision, are remaining patients/clients to be all paneled or will some be notified through their Attending physician.

Otherwise, all the patients /clients I was asked to contact have been contacted except one client I am still having difficulty contacting due to no contact information and another I am still attempting to contact but cannot reach. Also, I was successful contacting 3 clients / patients that previously did not have correct contact information and discovered through family members they have since deceased.

Thanks  
 Bonnie

Hi Bonnie

Did this all get sorted? The lab can provide MCP numbers.

Ken

Hi Ken

Heather Predham as requested we provide MCP #s for the remaining list of patients/clients, patients identified as not a repeat negative. There are a large number of patients still on the list. Can lab possibly provide this information? The list provided by Heather provides the ER PR result related to name & tissue sample #. I feel it safer for lab to confirm match of MCP to this information.

I understand the recalls or no contact clients / patients previously identified were not contacted by you. Therefore, do you feel these calls should be done at this stage or is it more appropriate to await the time the panel / attending physician will be calling them regarding their result.

Also, how are we going to find correct information for clients / patients that have incorrect contact information.

Thanks  
Danie Walker
