Subject: RE: Message from Dr. Neil re Hedy's question about ER/PR review

Hi,

I just spoke to Bonnie Walker regarding gathering the replies for the Discovery Undertakings. Bonnie has suggested that she take the lead on this issue to ensure consistency. She has been speaking with Paul regularly.

I have provided Bonnie with all of the information requested relating to credentialing, etc. The outstanding information is that which Hedy is gathering relating to the examinations, etc.

Bonnie has relayed to Paul that the undertakings relating to the Lab will take significant workload as the data will have to be gathered manually. Paul has replied to Bonnie and he has acknowledged the workload involved as it pertains to the Lab. The direction up to this point is to continue gathering the information required with the full understanding that we are unable to make the deadline relating to the Lab questions because of the workload involved.

Bonnie will keep everyone updated as Paul continues with his correspondence with her.

Hope this is helpful.

Thanks,
Monica

Yes I am aware of this from Hedy. I think Monica is aware of the # too.

Ken

Dr. Jenkins,

Dr. Neil wasn't sure if you were aware re the number of cases that would need to be reviewed. He notes it would be a monumental task. Number of cases is 37,000. And he notes this would need to be a manual review.
