**RE: Surgical Pathology Form**

Dora Cooper said the form is being printed today. There was a delay in printing because the printing machine needed for the red line was out of service – that meant there was a two-week waiting period.

Dora checked with Barry Dyer, Division Manager, Pathology, and he said the red line was needed, so it was agreed to wait the extra two weeks.

I left a message on Dr. Cook's voice mail advising him of this.
