I re-ordered the testing today. The number might change, but it is my prediction, based on original slides, that she will stay positive.

Subject: Retesting to be done
Importance: High

Nash,
I received a call from a lady who was wondering if she was retested. I reviewed her file and she was diagnosed in 2000 with ER 20-25% and PR 10-15%. In her OPIS chart it indicates in different areas as being positive and negative. She did not receive tamoxifen but was also never retested. I spoke with Sharon Smith yesterday and we feel that she will need to be retested . Her name is [REDACTED]
[REDACTED] MCP # [REDACTED]

Thank you Janet
